Aluminium Partition

Description

Durable and lightweight partitioning system using aluminum frames, ideal for both commercial and residential spaces.

Materials Used:

- » Aluminum profiles
- » Glass or solid panels
- » Rubber gaskets
- » Powder coating

Technical Features:

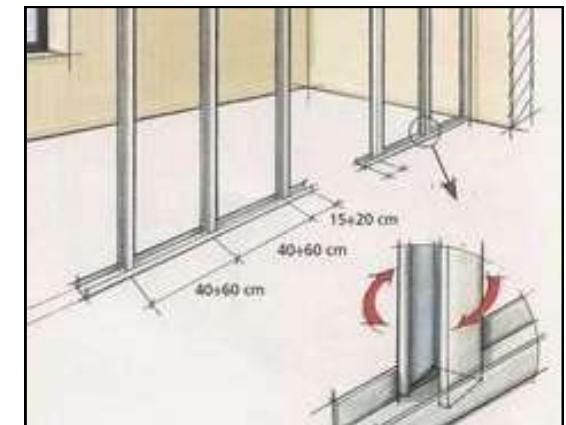

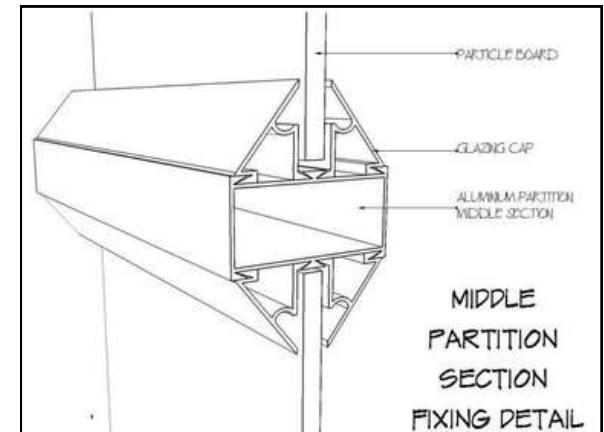

- » Corrosion resistant
- » Lightweight and strong
- » Customizable panel integration
- » Easy installation and relocation

Design Options

- » Clear or frosted glass
- » Powder-coated aluminum
- » Fabric or wooden laminated panels

Applications

- » Office cabins
- » Hospital divisions
- » Schools and universities
- » Commercial buildings

UPVC Partitions

Description

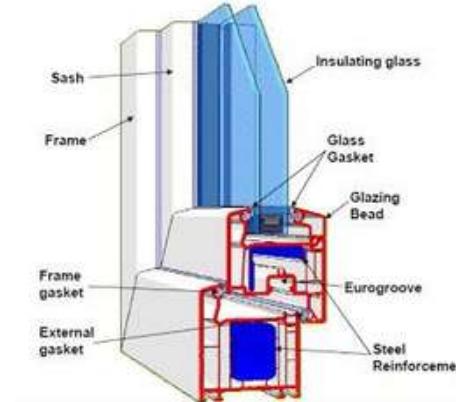

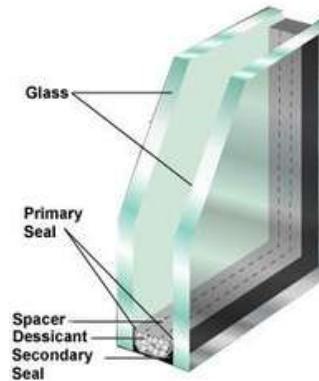

Modern and eco-friendly partitioning system made of unplasticized polyvinyl chloride, offering durability and low maintenance.

Materials Used:

- uPVC panels
- Reinforced steel or aluminum inside
- Sealing gaskets
- Glass (optional)

Technical Features:

- Thermal and sound insulation
- Fire retardant
- Termite and corrosion resistant
- Low maintenance

Design Options

- White, woodgrain, or colored uPVC
- Glass panel integration
- Textured surfaces

Applications

- Commercial office spaces
- Clinics and labs
- Residential indoor separations
- Educational institutions

Cement Board Wall Design & Partition

Description

Heavy-duty, moisture-resistant partition using fiber cement boards for interior or exterior spaces.

Materials Used:

- Cement board
- Metal studs or GI channels
- Joint tape and compound
- Insulation (optional)

Technical Features:

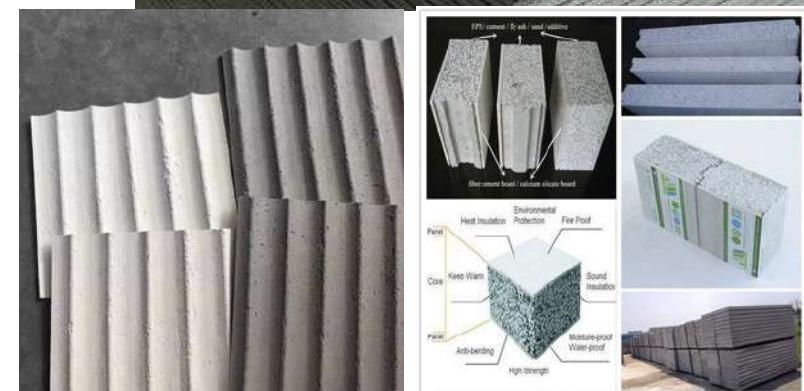

- Fire resistant
- Sound insulation
- Water and termite resistant
- Strong and durable

Design Options

- Smooth finish for paint
- Tile cladding
- Wooden laminate overlay

Applications

- Bathrooms and kitchens
- Exterior walls
- Industrial partitions
- Clinics and schools

Divider wall & Garden Privacy

Description

Side-rolling fabric screens with spring-loaded mechanism and metal framing for stylish privacy solutions. We also design fixed or movable privacy stands and walls using metal, wood, and WPC, enhanced with glass, acrylic, or polycarbonate to create beautiful, modern, and customized looks for any space. Fixed privacy walls can also serve as decorative display partitions for showcasing showpieces or enhancing interiors.

Materials Used:

- Fabric with spring-loaded mechanism.
- Metal, wood, and WPC structures.
- Glass, acrylic, or polycarbonate sheets.
- Powder-coated, polished, or laminated finishes.

Technical Features:

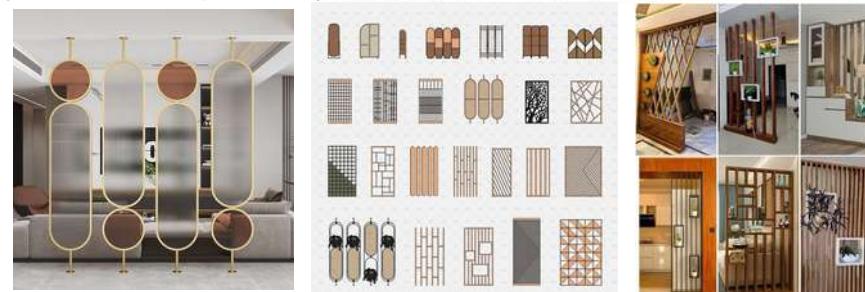

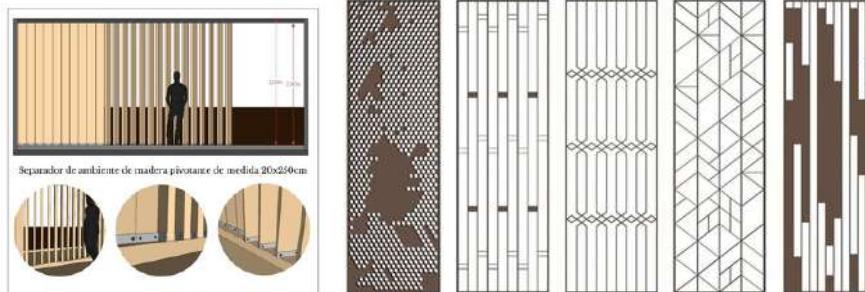

- Easy Operation
- Customizable Design
- Multipurpose Use
- Elegant Aesthetics

Design Options

- Side-Rolling Screens
- Privacy Stands
- Decorative Walls
- Custom Layouts

Applications

- Outdoor Areas
- Commercial Spaces
- Residential Interiors
- Display & Deco
