Subcategory	Description	Materials Used	Technical Features	Design Options / Finishes	Applications / Use Cases
Landscaping & Outdoor Setting	Creative outdoor layouts with greenery, pathways, and seating for beauty & usability.	Natural grass & plants, Pavers & stone, Wooden decking, Outdoor furniture, Lighting	Weather-resistant, Low-maintenance, Drainage & irrigation, Eco-friendly	Minimalist gardens, Themed landscapes, Hardscape + softscape mix, Custom seating & lighting	Homes, Hotels, Rooftops, Public parks
Outer Elevation & Facade Design	Stylish facades improving aesthetics, insulation & identity of buildings.	Glass, Aluminum, WPC Panel, ACP panels, Stone cladding, Ceramic panels	Weather & thermal resistant, Energy-efficient glazing, Lightweight cladding, Low-maintenance	Glass facades, Rustic stone, Metallic/matte ACP, Custom perforations	Commercial, Villas, Hotels, Institutions
Water Bodies & Fountains	Decorative water features for calming & luxurious outdoor vibe.	Stone, Fiberglass, Concrete basins, Stainless steel pumps, LED lights	Energy-efficient pumps, Adjustable flow, UV & weather resistant, Filtration	Geometric fountains, Tiered designs, Waterfalls/ponds, Interactive water play	Indoor, Gardens, Hotels, Parks, Events
Pool Covers & Safety Nets	Safety covers & nets ensuring cleanliness & reduced maintenance.	UV PVC, Polycarbonate, Mesh/netting, Aluminum/SS frames	Child/pet safety, Roll-on/off systems, Weatherproof, Anti-fungal	Manual/motorized, Transparent/opaque, Decorative nets	Private pools, Public pools, Resorts
Metal Structures (Sheds & Frames)	Heavy-duty steel structures for roofing & storage.	Galvanized steel, Mild steel, Stainless steel, Powder coating	Rust-proof, High load capacity, Modular, Long lifespan	Open/enclosed sheds, Painted/powder finish, Custom shapes	Carports, Storage, Industrial, Sports
Polycarbonate Shade	Lightweight UV-resistant shade structures with modern appeal.	Solid/hollow PC sheets, Aluminum/steel frames, UV coating	UV blocking, Shatterproof, Easy install, Heat resistant	Clear/tinted/frosted, Arched/flat, Colored options	Walkways, Carports, Gardens, Balconies
Awning & Canopy	Fixed/retractable shading for sun & rain protection.	Acrylic fabric, Polyester fabric, Aluminum frames, SS hardware	UV & waterproof, Manual/motorized, Rust-proof, Wind-resistant	Solid/striped, Scalloped edges, Wall-mounted/freestanding	Cafés, Patios, Shopfronts, Gardens
Sail Shade	Stylish HDPE fabric shades with tensile strength & UV protection.	HDPE fabric, SS fittings, Aluminum/galv. poles	UV & heat reduction, High tensile fabric, Custom sizes, Removable	Triangle/square/rectangular, Multi-color, Layered sails	Parking, Playgrounds, Poolside, Dining areas
Parking Shade	Protective car parking shades with weather resistance.	HDPE/PVC fabric, Steel/aluminum frames, Galv. fasteners	UV block 98%, Corrosion-resistant, Wind-stable, Low-maintenance	Cantilever, T-shape, Multiple fabric colors, Custom sizes	Carports, Commercial, Public facilities
Waterproofing Solutions	Protective coatings preventing seepage & structural damage.	Bitumen sheets, PU coating, Cementitious coat, aluminum foil, Sealants	High water resistance, UV/chemical proof, Flexible membrane, Long durability	Clear/colored, Spray/roll-on, Smooth/textured	Rooftops, Basements, Bathrooms, Exterior walls
Skylight Design & Treatment	Roof glazing for natural light with energy efficiency.	Tempered glass, Polycarbonate, Acrylic, Aluminum frames	Insulated glazing, Leak-proof sealing, Impact resistant, Custom design	Clear/tinted/frosted, Fixed/vented/retractable, Frameless or framed	Atriums, Malls, Living rooms, Greenhouses

Landscaping & Outdoor Setting

Description

Creative and functional outdoor layouts combining greenery, pathways, and seating to enhance beauty and usability of open spaces.

Materials Used:

- » Natural grass, plants, and trees
- » Pavers, tiles, and natural stone
- » Wooden decking
- » Outdoor furniture materials
- » Lighting fixtures

Technical Features:

- » Weather-resistant materials
- » Low-maintenance planting options
- » Drainage planning and irrigation systems
- » Eco-friendly landscaping solutions

Design Options

- » Modern minimalist gardens
- » Traditional or themed landscapes
- » Mixed hardscape and softscape designs
- » Custom seating and lighting

Applications

- » Residential gardens
- » Hotel courtyards
- » Rooftop terraces
- » Public parks

Outer Elevation & Facade Design

Description

Architectural exterior treatments that enhance aesthetics, improve insulation, and provide a distinctive identity to buildings.

Materials Used:

- » Glass, aluminum, and steel
- » ACP (Aluminum Composite Panels)
- » Natural stone cladding
- » Ceramic and porcelain panels
- » Decorative concrete finishes

Technical Features:

- » Weather resistance and thermal insulation
- » Energy-efficient glazing options
- » Lightweight yet strong cladding systems
- » Low-maintenance coatings

Design Options

- » Modern glass facades
- » Rustic stone textures
- » Metallic or matte ACP panels
- » Custom patterns and perforations

Applications

- » Commercial buildings
- » Villas and residences
- » Hotels and resorts
- » Institutional buildings

Water Bodies & Fountains

Description

Decorative water installations that create a calming and luxurious atmosphere for outdoor spaces.

Materials Used:

- » Natural stone
- » Fiberglass or concrete basins
- » Stainless steel nozzles and pumps
- » LED lighting

Technical Features:

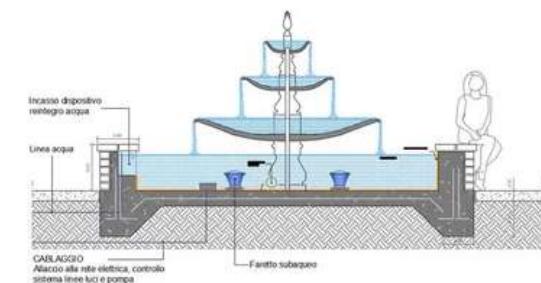

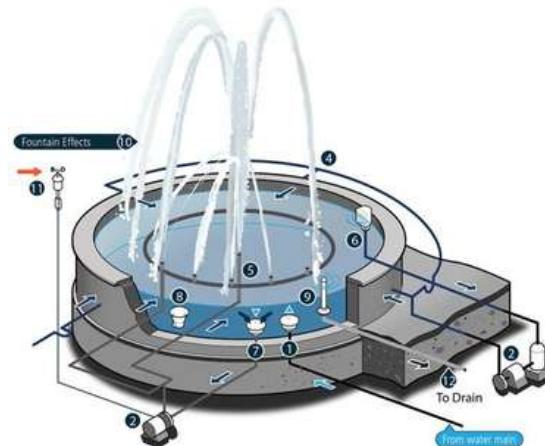

- » Energy-efficient pumping systems
- » Adjustable water flow and patterns
- » Weather and UV-resistant materials
- » Integrated filtration systems

Design Options

- » Modern geometric fountains
- » Traditional tiered designs
- » Waterfalls and pond features
- » Interactive water features

Applications

- » Gardens
- » Hotel lobbies
- » Public parks
- » Event venues

Pool Covers & Safety Nets

Description

Protective covers and nets for swimming pools to ensure safety, cleanliness, and reduced maintenance.

Materials Used:

- » UV-resistant PVC
- » Polycarbonate sheets
- » Reinforced mesh or netting
- » Aluminum or stainless steel framing

Technical Features:

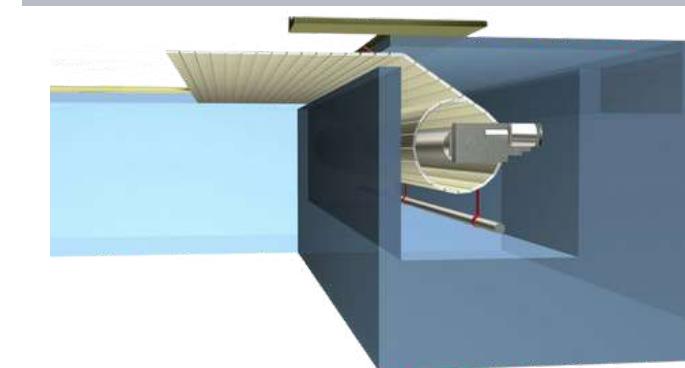

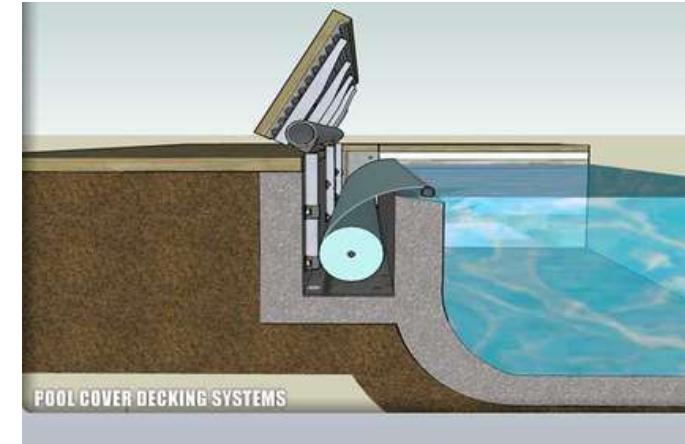

- » Child and pet safety features
- » Easy roll-on/roll-off mechanisms
- » Weatherproof and anti-fungal materials
- » Custom fit for any pool shape

Design Options

- » Manual or motorized covers
- » Transparent or opaque panels
- » Decorative safety nets

Applications

- » Private pools
- » Public swimming facilities
- » Hotel and resort pools

Metal Structures (Steel Sheds, Frames)

Description

Durable and customizable steel structures for roofing, storage, and functional outdoor spaces.

Materials Used:

- Galvanized steel
- Mild steel
- Stainless steel
- Powder coatings

Technical Features:

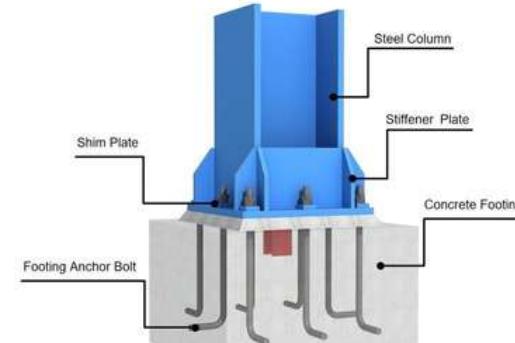

- Corrosion-resistant coatings
- High load-bearing capacity
- Modular design for flexibility
- Long lifespan with minimal maintenance

Design Options

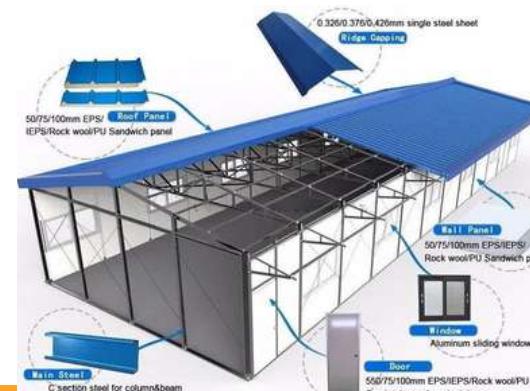

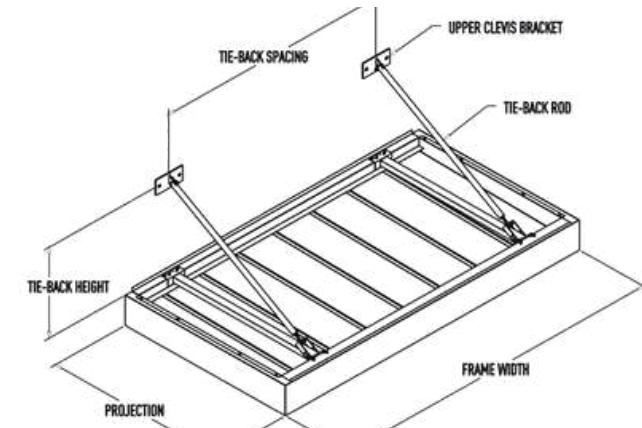

- Open or enclosed sheds
- Painted or powder-coated finishes
- Custom shapes and dimensions

Applications

- Carports
- Outdoor storage
- Industrial shelters
- Sports facilities

Polycarbonate Shade

Description

Lightweight and impact-resistant shade structures using polycarbonate sheets for UV protection and weather resistance.

Materials Used:

- » Solid or hollow polycarbonate sheets
- » Aluminum or steel framework
- » UV-protective coatings

Technical Features:

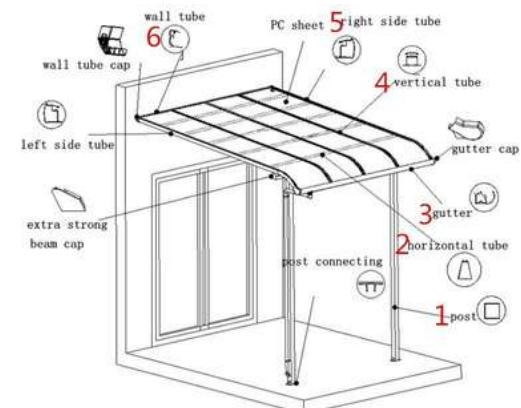

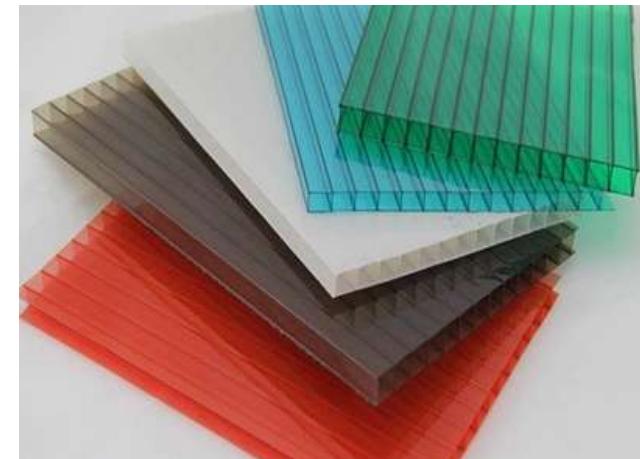

- » High light transmission with UV blocking
- » Shatter-resistant material
- » Easy to install and maintain
- » Temperature resistance

Design Options

- » Clear, tinted, or frosted sheets
- » Arched, flat, or custom shapes
- » Colored polycarbonate options

Applications

- » Walkways and corridors
- » Carports
- » Garden covers
- » Balcony roofing

Awning & Canopy

Description

Retractable or fixed shade structures designed to protect against sun and rain while enhancing outdoor aesthetics.

Materials Used:

- Acrylic or polyester fabric
- Aluminum frames
- Stainless steel hardware

Technical Features:

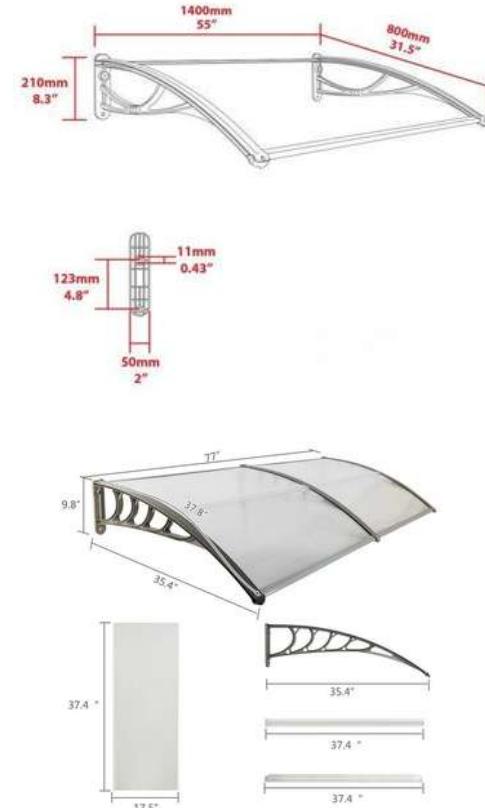

- UV and water-resistant fabrics
- Manual or motorized retraction systems
- Rust-proof metal fittings
- Wind-resistant designs

Design Options

- Solid colors or striped patterns
- Straight or scalloped edges
- Freestanding or wall-mounted

Applications

- Cafés and restaurants
- Balconies and patios
- Shopfronts
- Garden seating areas

Sail Shade

Description

Stylish, tensioned fabric shades that provide UV protection and enhance the visual appeal of outdoor spaces.

Materials Used:

- » High-density polyethylene (HDPE) fabric
- » Stainless steel tension hardware
- » Galvanized or aluminum poles

Technical Features:

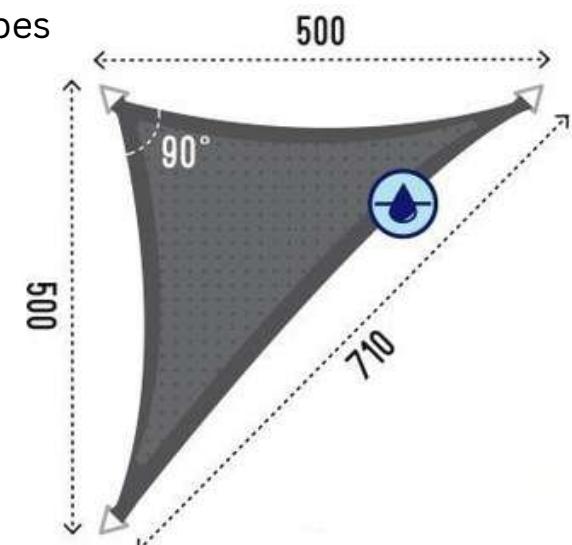

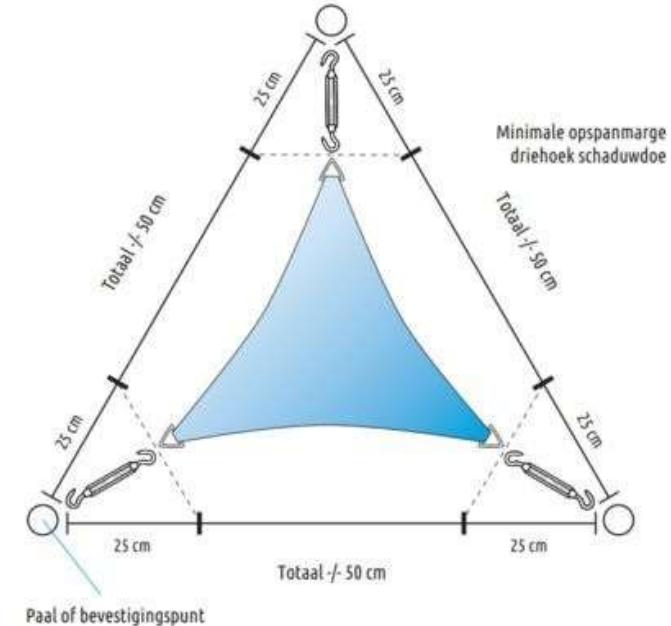

- » UV and heat reduction
- » High tensile strength fabric
- » Custom shapes and sizes
- » Easy to remove for seasonal storage

Design Options

- » Triangular, square, or rectangular shapes
- » Multiple color choices
- » Layered or single-sail designs

Applications

- » Parking lots
- » Playgrounds
- » Poolside areas
- » Outdoor dining spaces

Parking Shade

Description

Protective structures designed to shield vehicles from sunlight, rain, and other weather elements.

Materials Used:

- HDPE shade fabric or PVC membrane
- Steel or aluminum frame
- Galvanized fasteners

Technical Features:

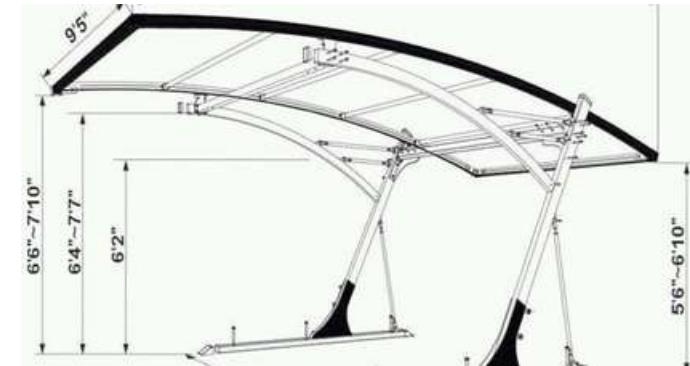

- UV blocking up to 98%
- Weather and corrosion resistance
- Engineered for wind stability
- Low maintenance

Design Options

- Cantilevered or T-shaped designs
- Multiple fabric colors
- Custom dimensions for parking layout

Applications

- Residential carports
- Commercial parking areas
- Public facilities

Skylight Design & Treatment

Description

Architectural glazing installed on roofs or ceilings to allow natural light while maintaining energy efficiency and weather protection.

Materials Used:

- » Tempered or laminated glass
- » Polycarbonate sheets
- » Aluminum or steel framing
- » UV coatings

Technical Features:

- » Thermal insulation options
- » Leak-proof sealing systems
- » Impact resistance
- » Custom shapes and sizes

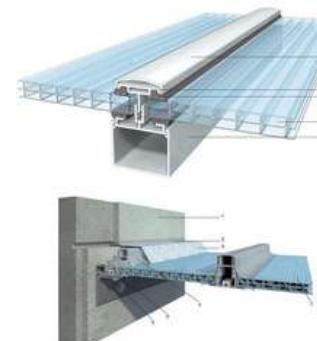

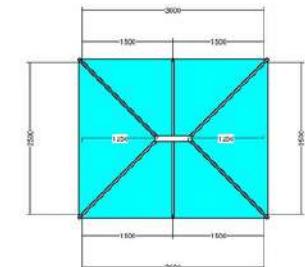

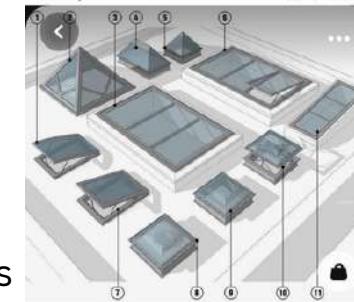

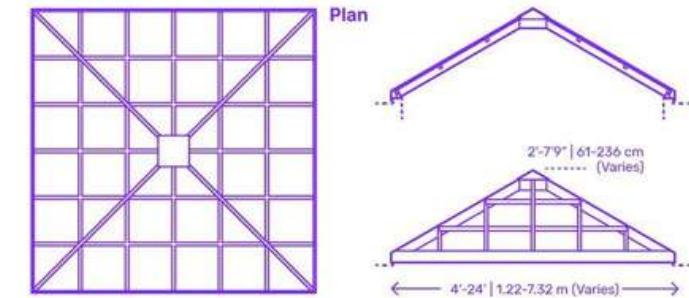

Design Options

- » Clear, tinted, or frosted glazing
- » Fixed, vented, or retractable designs
- » Frameless or framed styles

Applications

- » Atriums
- » Shopping malls
- » Residential living spaces
- » Greenhouses

Waterproofing Solutions

Description

Protective treatments and coatings that prevent water seepage and structural damage in buildings.

Materials Used:

- Bituminous membranes
- Liquid waterproofing compounds
- Polyurethane coatings
- Cementitious coatings

Technical Features:

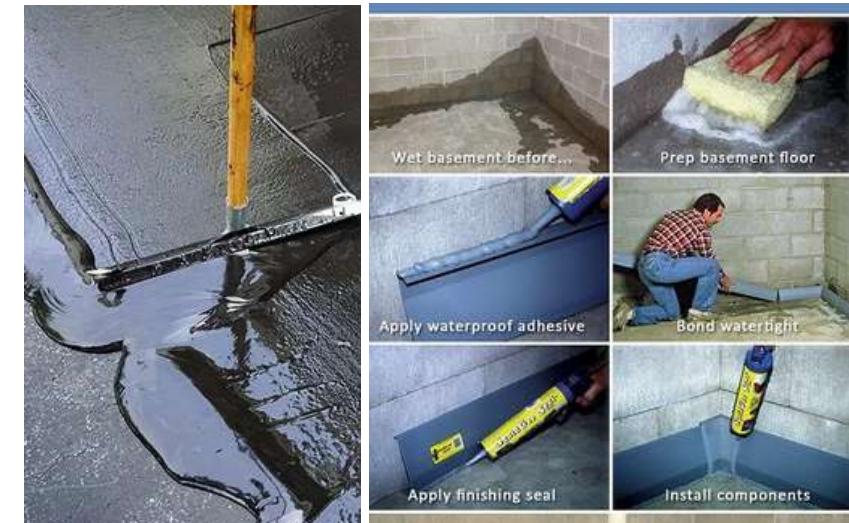

- High water resistance
- UV and chemical resistance
- Flexible membrane technology
- Long-term durability

Design Options

- Clear or colored coatings
- Spray or roll-on application
- Smooth or textured finish

Applications

- Rooftops and terraces
- Basements
- Bathrooms and wet areas
- External walls
